DETAILED ACTION

Specification

1. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.
2. A brief description for each of the figures 3-25 and 27-30 needs to be provided.
3. The title of the invention is too long. A new title is required that is clearly indicative of the invention to which the claims are directed.
4. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of **50 to 150 words**. It is important that the **abstract not exceed 150 words in length** since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Claim Objections

5. Claims 36-95 are objected to because of the following informalities: claim 1, line 7, "type" should be replaced by "decoder"; line 19, what does it mean by "extremum

aggregate metric"? line 22, "these" needs to be deleted. The same comment applies to similar limitations recited in the other base claims. Claim 37, what does it mean by "error cues"? line 3, "wherein the" should be replaced by "wherein each". The same comment applies to claims 49, 62, 73, 85 and 91. Claim 38, line 3, shouldn't "the two" be "two"? The same comment applies to claims 41, 50, 63, 66, 74, 77 and other claims reciting similar limitation. Claim 40, what does it mean by "resemblance cues"? line 4, "wherein the" should be replaced by "wherein each". The same comment applies to claims 52, 65, 76, 86 and 92. Claim 54, lines 8 and 9, "and the calculation of the" should be "and a calculation of a". Claim 82, line 2, "means" should be replaced by "circuit" so as to be consistent with antecedent in claim 71, line 8. Note that any claim whose base claim is objected is likewise objected. Appropriate correction is required.

Allowable Subject Matter

6. Claims 36-95 are allowed. However, the claims must be amended if necessary to overcome any objection set forth above.

Conclusion

7. This application is in condition for allowance except for the above noted formal matters.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
